DETAILED ACTION

Information Disclosure Statement

The information disclosure statements filed on December 9, 2003 and January 29, 2004, have been fully considered by the examiner.

Allowable Subject Matter

Claims 1-31 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

As to claims 1 and 16, the prior art of record, taken alone or in combination, fails to disclose or render obvious the use of a ring interferometer comprising a sensing volume in a biosensor.

Pertinent Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of record is Boiarski et al. (USPN 5,173,747) and Tapalian et al. (USPN 6,657,731).

Boiarski discloses an apparatus for use in an immunoassay device comprising a Mach-Zender interferometer with a sensing cavity for measurement located on the measurement arm of the interferometer.

Tapalain discloses a resonator sensor comprising a waveguide in the form of a Mach-Zender interferometer that evanescently couples light into a microcavity found along the measurement arm of the interferometer.
